| Summary | | | | |
| <p>Netegrity SiteMinder is a market-leading access management solution for web-based and enterprise applications. SiteMinder software creates a secure foundation for centralized, policy-based authentication and authorization management across heterogeneous environments, providing powerful federation support, enterprise-class manageability, and proven scalability. SiteMinder also features out-of-the-box integration with leading enterprise applications and robust, open APIs for easy customization. VASCO has developed a plug-in in for Netegrity SiteMinder to allow authentication using dynamic One-Time Passwords generated by Digipass tokens.</p> | | | | |
